

Gomde Retreat Cabins

The upcoming retreat cabins at Rangjung Yeshe Gomde will give practitioners the possibility to stay in individual retreat for shorter or longer periods of time.

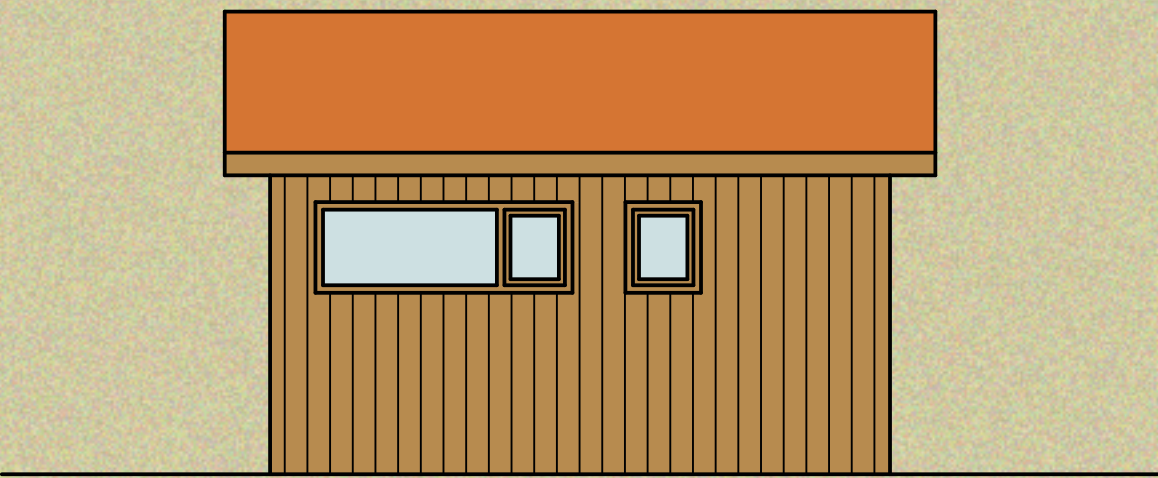

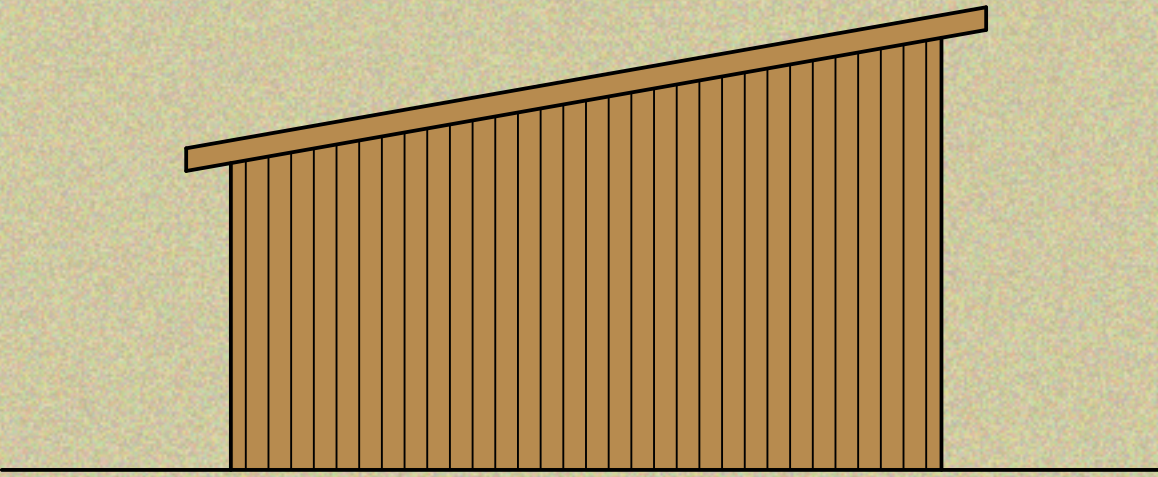

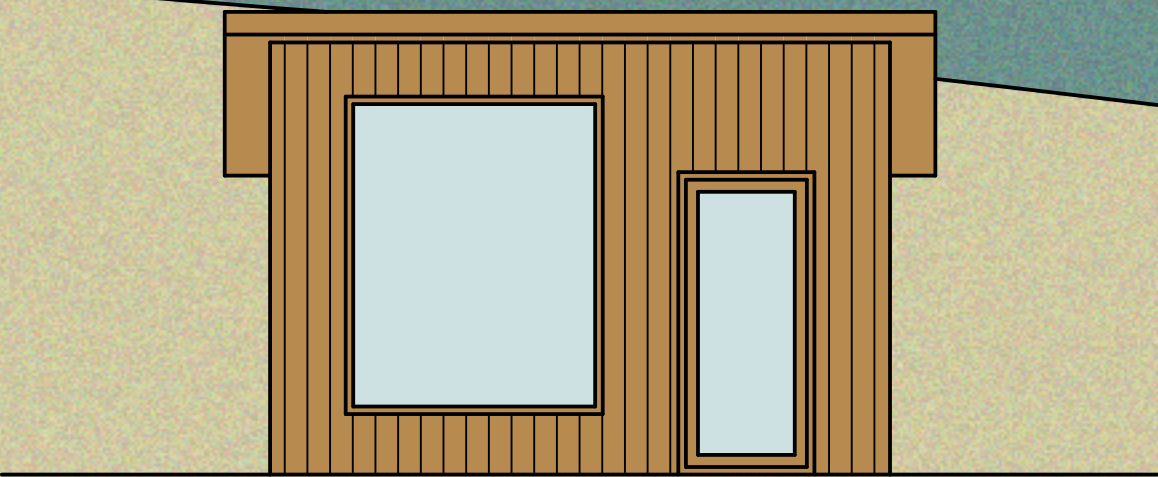

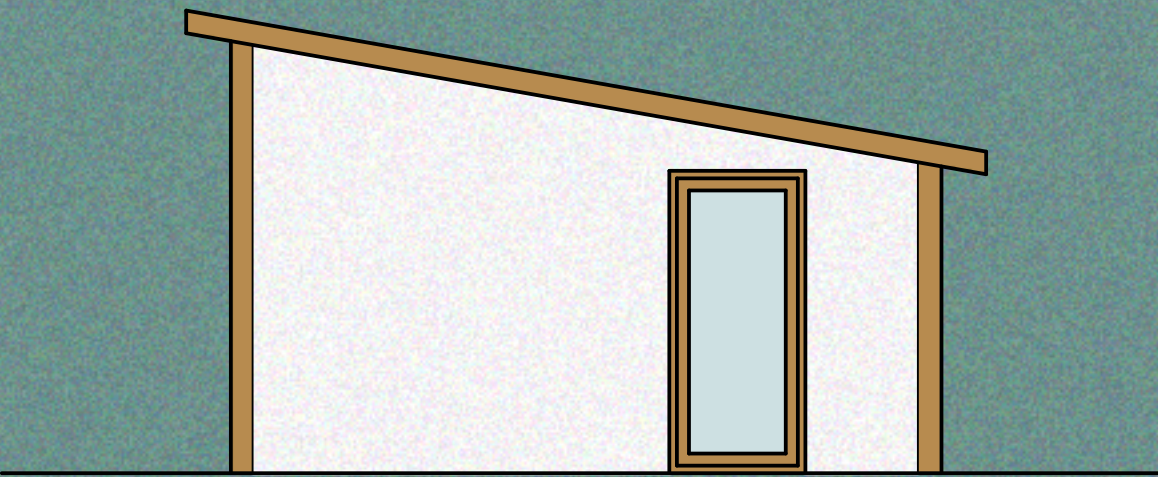

The cabins will be placed discreetly tucked behind the trees on the slope at the southern side of Gomde. The design is simple with a one-sided slanted roof opening up towards the hills to the south.

The practical functions - entrance, kitchen and bathroom - are kept in the northern end of the cabins whereas the room to the south is reserved for focus and immersion in the practise.

The room has a large tall window giving a clear view of the sky and a door allowing you to enter directly into the surrounding landscape.
